Lazy Day

This room is for anybody who loves to chill and hang out. Everything in this room is relaxing. From TV in bed to watching a lava lamp with wax

going up..., and then down. You can play games on the computer and play with the cats. There is also lots of storage in the bed and bookshelf and

a great sunset view out of the window. The loft bed has a nice big bean bag under it to relax and read a nice book on a rainy day. Also everything is gray so it's a nice, relaxing, blah-colored room. If you are really imaginative the blah-colored could be very colorful and vivid. There is also some vegetation to give the room a natural look. This room is also a great place to work on projects and other things. There is even a huge selection of books to read! A kid would want this room because sleeping is king there and is just perfect for having a good relaxing time.
